Summary

Data Science undergraduate at SLIIT (2022–Present, **expected** graduation in September/October 2026) and former student of D.S. Senanayake College, Colombo. Skilled in Python, SQL, Power BI, machine learning, and project management, with experience in computer vision and predictive modeling. Able to turn complex data into actionable insights and build impactful AI solutions.

Work Experience

Project Management Intern | VSIS | April 2025 – October 2025

- Assisted in managing Cloud-related & InfoSec related projects by coordinating tasks between development and business teams, improving workflow clarity and task tracking
- Supported project planning and documentation, ensuring timely updates and better communication across stakeholders

Business Researcher | Freelance | June 2024 – December 2024

- Conducted research on business models and IT strategies, contributing to improved sales insights and decision-making processes.

Technical Skills

Programming Languages	Python, R, SQL, JavaScript
Libraries/ Framework	Pytorch, Roboflow Inference SDK, Google GenAI, OpenCV, Pillow, Pydantic, SHAP, PyMc, Flask, React.js, Express.js
AI & Cloud Services	OpenAI, Gemini, Google Cloud Vision, Roboflow
Other	Azure, AWS, Statistics, Docker, VLMs
Data Tools	Power BI, Excel
Databases	Oracle, MySQL, MongoDB, SQL, Firebase, Superbase
Project Management	Jira, Asana, Trello, Microsoft Project

Soft Skills

- Leadership & Teamwork
- Time Management
- Analytical, Communication & Problem-Solving Skills

Personal Projects

Criclytics

[Demonstration](#)

[Visit GitHub Repository](#)

- Created engaging Power BI dashboard for cricket analytics using real-world data.
- Gained insights into game strategies, player performances, and trend analysis.
- Streamlined data processing and visualization for faster reporting.

Competitions

MedIntel (AI-Based Antibiotic Recommendation System) - Brainstorm 2025 (IEEE EMBS University of Moratuwa)

- MedIntel, an AI-based antibiotic recommendation system addressing antimicrobial resistance — **selected to semifinals**.
- Led to Develop a ML-driven engine combining symptoms, patient data, and clinical guidelines for accurate, explainable prescriptions.

Academic Projects

FoodLensAI (Food & Dietary Label Analysis System)

[Demonstration](#)

- Leading development of an AI-powered system (**Ongoing Research Project**) delivering sustainability, compliance, health impact, and market intelligence insights from U.S. food & dietary supplement labels.
- Developing a multimodal extraction and sustainability analysis module for the solution.

Retention Radar (Predictive AI model)

[Visit GitHub Repository](#)

- Led a hiring analytics project for data scientists, performing data cleaning, preprocessing, and handling imbalanced datasets.
- Built and deployed predictive models (Decision Trees, Random Forest, SVM, Logistic Regression) using Flask with a Simple web interface.

Instrument Hub (AI recommendation System)

[Visit GitHub Repository](#)

- Developed a personalized e-commerce recommendation system for musical instruments using machine learning, applying collaborative and content-based filtering and improved recommendation accuracy.

Online Certificates

[Statistics Foundations \(1-4\)](#) , [Learning Data Analytics: 1 Foundations](#), [Power BI: Dashboards for Beginners](#), [R for Data Science: Analysis and Visualization](#) , [Business Analysis Foundations](#), [SQL for Data Analysis](#) , [Artificial Intelligence Foundations: Machine Learning](#), [Deep Learning: Getting Started](#)
